

WHAT DOES A SKIN HEALTH CHECK INVOLVE?

A Skin Check is a visual inspection of your skin by a trained Practitioner. They use a Dermatoscope which allows them to see the subsurface layer of your skin - more than the naked eye. No blood work or biopsies are taken at your skin check.

WHO WILL PROVIDE MY SKIN CHECK?

One of our fully qualified Skin Cancer Screening Practitioners. They have all trained with Skin Cancer College Australia and are committed to detecting skin cancer in it's earliest most treatable stage. They are passionate about reducing the incidence of disease by raising awareness of effective skin cancer prevention techniques.

HOW LONG WILL THE SKIN CHECK TAKE?

Your Skin Check will take 15 minutes. This includes personalised skin cancer education tailored to your specific skin type and time to ask questions.

WHAT AREAS OF MY BODY WILL BE SCREENED FOR SKIN CANCER?

We conduct a thorough assessment, head to toe. If you are unsure about a full body assessment, we are happy to work within your comfort level.
